DESCRIPTION OF DIFFICULTY

Long itinerary that requires a high level of fitness. At the beginning of the season the higher parts of the ascent route and the descent are covered in snow. Attention should also be paid to falling stones, dislodged by other mountaineers or by the thaw.

TOTAL ASCENT

900

FERRATA ASCENT

600

PERIOD

From June to October, depending on snow conditions.

POPULARITY

High

GEAR

Normal via ferrata kit. At the beginning of the season, or in case of recent snowfall, appropriate snow gear should be taken. A torch is necessary for the Castelletto tunnel.

GETTING THERE

From Cortina take the road towards Passo Falzarego. Near a little church after Pocol, a signed track leads off to the right. Turn

left at the next fork and continue to Rifugio Dibona.

ACCESS

From the Rifugio Ivano Dibona take path no. 404 and traverse beneath the imposing Tofana di Rozes to equipped steps that

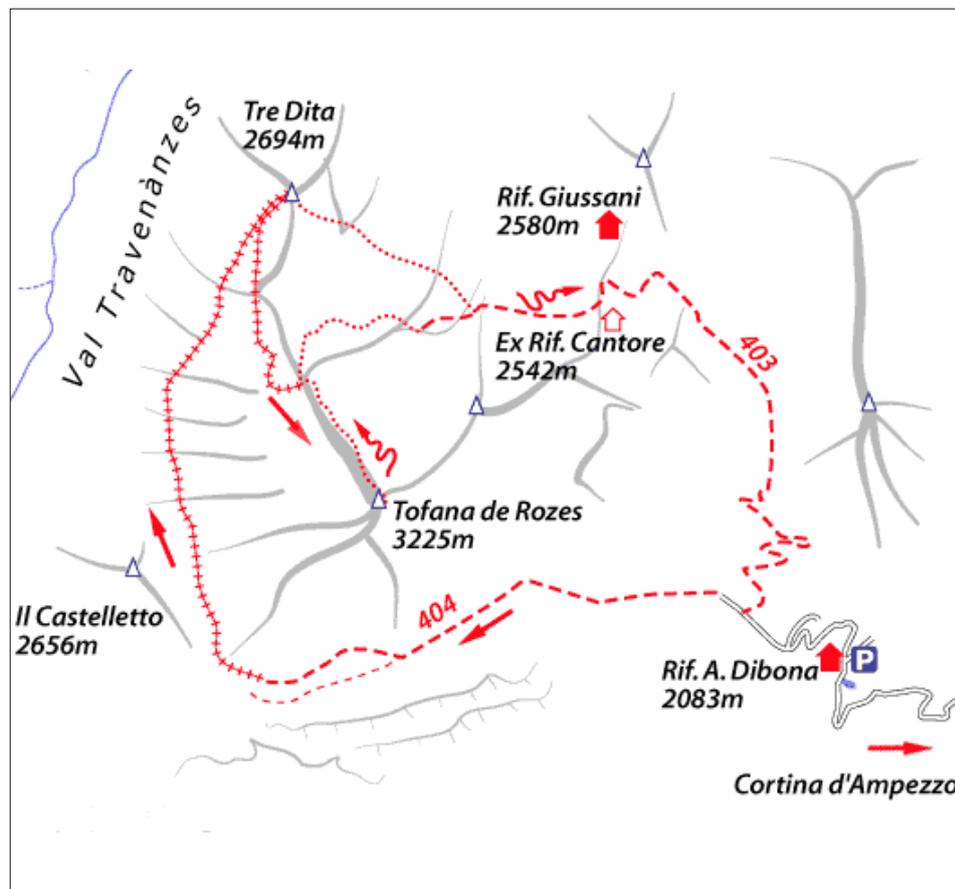

steps and ledges. At the fork (2680m), near the 'Tre dita', continue along the ledge to the right (Rifugio Giussani is reached by walking left), then continue up numerous steps and a tiring ramp to reach the smaller peak (3027m), where the ferrata ends. Follow the track to the summit and the cross.

DESCENT

The descent follows the same route as the ascent as far as the pre-peak, then follow the normal path to the right (NE). Follow the blue markers across ledges and scree down to Rifugio Giussani. This descent requires particular care when snow is present. From Rifugio Giussani follow path no. 403 back to Rifugio Dibona.

lead up to the Castelletto tunnel.

ASCENT

This ferrata is reached through the characteristic 'Galleria del Castelletto' (2740m). Ascend this tunnel, dug out by the Alpini soldiers during the First World War (height gain 120m - length 500m – torch necessary).

The route then continues on the W/NW Face of the Tofana di Rozes up a long, winding ascent of alternating steep
